

Recognize

Recognize

- Panting
- Stops playing or lies down
- Stumbling, disoriented
- Warm ambient temperature
- Take temperature if possible

Act

- Stop activity
- Move to cool location
- Call for help (nearby vet, help for transport)

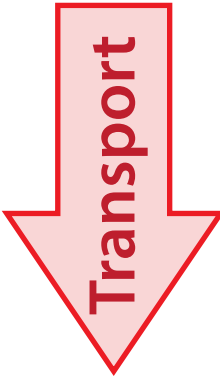

Actively Cool Animal

- Apply cool running water to entire body, emphasizing areas with less fur, soaking to the skin
- Do not apply water to head and neck (drowning risk)
- Apply water for 15 minutes, continue until temperature $\leq 104^{\circ}\text{F}$ (40°C)
- Dog should calm, panting should improve
- Pat dry with towel

Transport

- Transport safely to nearest open veterinary hospital
- Transport in a cool environment (fan / air conditioning)

Transport
